

Shapeshifter

by Lee Meredith - leethalknits.com

One simple pattern, infinite possibility!
Shapeshifter is an asymmetrical chevron shaped knit piece which can be worn in a seemingly endless number of cowl and hooded cowl shapes!

To make it even more customizable, this is an any-gauge pattern, which means you choose absolutely any yarn you want, and pick the needles to get the gauge you like, then do some simple math to make your unique piece!

The eyelet pattern along all edges and the chevron seam is designed for maximum versatility - with buttonholes everywhere, it's so much fun to play with different positions and shapes!

While the Shapeshifter can be complex to wear, it's very simple to knit, and is a great pattern for a beginner looking to branch out! The chevron "lace" is just eyelet holes made with easy yarn-overs and decreases, and there is no shaping or anything, just a big, flat piece of fabric.

Different gauges will result in different fits and shapes - a bulky, tightly knit Shapeshifter will be more sculptural, holding its poses, with less drape. A finer or more loosely knit piece will fall freely into its own shape, and perhaps act more as a shawl when positioned as such. Make yourself a few different versions in different weights and fibers, and have a Shapeshifter handy for whatever the weather and outfit call for!

Shapeshifter is copyright Lee Meredith 2010 - for personal use only, no reprinting/redistributing - thanks! Visit the leethalknits.com faq page or the leethal ravelry group if you have questions or need help.

Wear it

This is the fun part! Play around and find your favorite styles...

Hooded or no hood:

Happy knitting!
